

# HERLAMBANG RAFLI WICAKSONO

## RAFLI

Cybersecurity researcher and software engineer with expertise in **Vulnerability Assessment and Penetration Testing (VAPT)**, secure software development, and DevOps since **2019**. Experienced in building and securing applications, performing security assessments, and leading technology teams. Passionate about offensive security, cryptography, and ethical hacking.

## EDUCATION

**Cryptography Engineering (Bachelor)**  
National Cyber and Crypto Polytechnic

## CERTIFICATIONS

**eLearnSecurity Web Application Penetration Tester eXtreme | INE Security**  
Issued: Jan 2026

**TryHackMe PT1 Certified – TryHackMe**  
Issued: March 2025

**CompTIA Network Vulnerability Assessment Professional (CNVP) – CompTIA**  
Issued: February 2025

**CompTIA PenTest+ ce Certification – CompTIA**  
Issued: February 2025

**Junior Penetration Tester – Badan Nasional Sertifikasi Profesi (BNSP)**  
Issued: November 2024

**Certified AppSec Pentester (CAPen) – The SecOps Group**  
Issued: November 2024 | Credential ID: 9340659

**Microsoft Certified: Security Operations Analyst Associate – Microsoft**  
Issued: February 2024 | Credential ID: 800B0A4CB84A67D0

**Certified AppSec Practitioner (CAP) – The SecOps Group**  
Issued: December 2022 | Credential ID: 6857815

**CompTIA Security+ ce Certification – CompTIA**  
Issued: August 2022

## EXPERIENCE

### Penetration Tester

PT Gan Mitra Usaha (2025-2026)

- **Penetration Testing & Vulnerability Assessment:** Conducted comprehensive assessments across diverse environments, identifying and validating **10,000+ vulnerabilities** to strengthen enterprise-level security posture.
- **Vulnerability Management:** Manage the end-to-end vulnerability management lifecycle for **1,000+ assets**, prioritizing and remediating critical risks through structured mitigation and continuous monitoring.
- **Compliance & Security Posture Assessment:** Performed detailed CIS Benchmark-based compliance assessments across **multiple fintech infrastructures** with a combined valuation exceeding US \$976 million, delivering measurable improvements in security maturity and regulatory alignment.

### Security Consultant

PT Juke Solusi Teknologi (2025)

- Conducted comprehensive **penetration testing** across application and infrastructure environments, identifying security weaknesses and validating real-world exploitability.
- Performed **security risk analysis** to assess business impact, threat likelihood, and exposure, supporting risk-based decision making.
- Assisted engineering teams in **integrating security controls into CI/CD pipelines**, strengthening secure-by-design development workflows.

### Co-Founder

SiberLab ID (2023-Now)

- Spearheading an innovative **cybersecurity** and **software-development** startup, delivering **10+ tailored products** for government, education, and private-sector clients.
- Organized and managed **10+ national-scale security events**, including **Capture The Flag (CTF)** competitions — serving as vendor for **three of Indonesia's largest national attack-defense CTFs**.
- Founded and scaled **Akademi Siber**, a local cybersecurity learning platform with **500+ active students**, featuring **hands-on machine-lab environments** and **AI-driven mentorship modules** to enhance technical skill development.

# EXPERIENCE

## Cybersecurity Researcher / Engineer

Confidential Cyber Agency (2024-Now)

- Conducting **research and development** of **cybersecurity products and IT solutions** to strengthen national digital resilience.
- Performing security evaluations and compliance **assessments of IT products** in accordance with **ISO/IEC 15408:2022 (Common Criteria)** international standards.
- Executing **penetration testing and vulnerability analysis** for **vital information infrastructure (VII)** to identify, assess, and mitigate critical risks.

## Vice Chairman

Wreck IT (Seasonal) (2023)

- Directed **cybersecurity training programs and Capture The Flag (CTF)** event execution, engaging participants across multiple technical skill levels.
- Led **technical planning and infrastructure development** for competitive cybersecurity events, ensuring secure, scalable, and high-availability environments.
- **Coordinated cross-functional teams** to deliver successful national-level cybersecurity competitions.

## Head of Information Technology

Trojans (Seasonal) (2023)

- Oversaw **end-to-end IT infrastructure and security operations**, ensuring system availability, confidentiality, and integrity.
- Implemented **security controls and monitoring mechanisms** to support organizational operations and event readiness.

## Cyber Security Engineer

Central AI (PT Central Artificial Intelligence) (2022)

- **Conducted security assessments** for AI-based applications, identifying risks across application and infrastructure layers.
- Consult **defensive security measures** to strengthen application resilience against common attack vectors.

## Technical Officer

Wreck IT (Seasonal) (2022)

- Led **technical development and cybersecurity initiatives** supporting training programs and competitive environments.
- **Designed and maintained secure systems** for **hands-on** cybersecurity learning and simulations.

## Application Security Engineer

Sekolah Siber (2020-2023)

- Implemented **web security controls** and testing across multiple national-scale platforms, **applying OWASP-aligned practices** (input validation, auth/session hardening, access control checks) and coordinating remediation based on findings.

Cakrawala, 15(2), 174–187, 2021.

# ACHIEVEMENTS

- Finalis Cyber Jawa 2023 [Kategori Umum]
- 3rd place Networking Competition TECHNOLOGY EUPHORIA 2023
- 6th Place ASEAN Student Contest on Information Security (ASCIS) CTF
- Finalist of HOLOGY 6.0 Capture The Flag Competition
- Finalist of Techcompfest Capture The Flag Competition 2023
- Finalist NU-TECH CTF 2022
